TECHNICAL SKILLS

Languages: Ruby, TypeScript, Python, SQL, C++, Kotlin, MATLAB, Verilog, VHDL

Frameworks/Libraries: Ruby on Rails, React, React Native, Remix, GraphQL, TensorFlow, Firebase

Tools & Platforms: GitHub, Graphite, BigQuery, AWS, Figma, Android Studio, Chrome Web Store

EXPERIENCE

Shopify | *Software Engineering Intern, Selling Strategies*

May 2026 – Aug 2026

- Owned design and shipping of **~12 production features** on Shopify's flagship subscription-management app (**47k+** merchants, **\$170M+** annualized GMV) with autonomy to deploy directly to production
- Shipped new public filter/sort capabilities to Shopify's **GraphQL** APIs in **Ruby on Rails**, exposing query primitives to every partner integration, with a memory-leak fix and edge-case test coverage
- Delivered full-stack features across **Ruby on Rails**, **GraphQL**, and **React/Remix** with comprehensive unit + integration tests and internationalization across **32 locales**

Shopify | *Software Engineering Intern, App Platform*

Sep 2025 – Dec 2025

- Owned end-to-end delivery of **2 production UI components** in Shopify's **React Native** design system, accelerating feature delivery across internal and partner-facing surfaces
- Designed **component APIs/variants** and standardized interaction & loading patterns, replacing ad hoc implementations with **reusable primitives** adopted by **100+ development teams**
- Streamlined developer workflows by triaging the engineering backlog and resolving **25+** bugs/workflow issues, improving median PR turnaround by **10%** and driving **critical bugs to 0**

Boxx Insurance | *Software Engineering Intern*

Jan 2025 – Apr 2025

- Built **Python + Power Automate** pipelines that automated claims-processing approvals end-to-end, cutting manual handling time by **60%** for the operations team
- Tuned **Amazon Q** context retrieval through iterative prompt engineering, reducing the team's debugging cycle time on data-pull queries by **~40%**
- Researched and evaluated SaaS security tools for dark-web threat monitoring, recommending a cost-effective solution that saved **25%** in licensing fees vs. the incumbent

HDFC Ergo General Insurance | *Frontend Engineer Intern*

May 2024 – Aug 2024

- Built and shipped frontend features for the 1UP insurance super-app (**React + JavaScript**) used by **50,000+** customers, contributing to the team's **35%** engagement lift
- Implemented **Firebase**-backed timesheet sync with optimistic UI updates, raising on-time submission rate by **30%** across **200+** field agents and reducing manual reconciliation
- Designed and integrated role-based access control and session management, hardening the app's authentication layer ahead of a security audit and cutting unauthorized access by **20%**

PROJECTS

TaxLens | *Chrome Extension — After-tax pricing for Amazon.ca*

[Chrome Web Store](#)

- Built and published a **Chrome Extension** that surfaces real after-tax Amazon.ca prices, applying **HST/GST/PST/QST** rules across all **13 Canadian provinces and territories**
- Shipped to the **Chrome Web Store** with **70+ organic installs**; engineered a privacy-first architecture (local storage, no accounts, opt-in IP geolocation) in a **~27KB** bundle

Football World Cup Predictor | *Machine Learning Model*

- Built a **TensorFlow**-based football match-prediction model trained on **10 years** of historical data and live sports APIs, achieving **~70%** prediction accuracy across friendlies and tournament fixtures
- Engineered tournament-aware weighting for knockout rounds (raising high-stakes accuracy by **6%**) and recency weighting across each team's last **20** matches, boosting short-term performance by **12%**

EDUCATION

University of Waterloo | *BASc in Computer Engineering*

Expected graduation: Apr 2028

- Coursework:** Algorithm Design and Analysis, Real-Time Operating Systems, Digital Hardware Systems, ASIC Design, Embedded Systems
- Involvements:** Orientation Director, EngSoc First Year Conference Director, SOC Sports Director, Soccer Intramural Official, Indian Student Association Content Creator
